PROJECT-BASED LEARNING (PBL) ASSESSMENT – Review 1

RUBRIC FOR PROJECT-BASED LEARNING (PBL) ASSESSMENT WITH A TOTAL OF 30 MARKS, CATEGORIZED BASED ON BLOOM'S TAXONOMY:

COs	Criteria	Marks	Description	Marks Obtained
CO1 – (Problem Identification)	Clarity of Domain Knowledge	5	Explains the cybersecurity/PBL domain clearly; identifies the firewall/network-security concepts involved; demonstrates understanding of the background and key terminology.	
	Literature Review	5	Presents relevant research papers, existing firewall/network-monitoring approaches, tools and technologies; identifies existing limitations or gaps that motivate the proposed PBL solution.	
	Problem Statement	5	Clearly defines the problem addressed by the PBL project, its relevance and scope, the users/target environment, and why a firewall-rule management and monitoring solution is required.	
CO2 – (System Design & Methodology)	Objectives	8	Presents clear, measurable and achievable objectives aligned with the problem. Objectives should guide development, such as rule creation/management, monitoring, logging, alerting, access control or visualization as applicable to the proposed system.	
	System Requirements (Hardware / Software / Tools)	7	Identifies the hardware, software, operating system, programming language/frameworks, firewall/network tools, database/logging components and other resources required for implementation. Explains the purpose of the major tools selected.	

Total Marks: 30
